

PROTECT YOUR GROUND SURFACES WITH
A QUICK AND EASY **TOOLLESS** ASSEMBLY.

VERSARE
Modular Flooring

EverBase 4
Stadium
Track & Turf
Protection

Use EverBase 4 flooring to protect turf and track from damage due to concerts, festivals and other stadium-hosted events.

Versare Flooring transforms your stadium from a sports surface to a venue capable of hosting concerts, special events, shows and more.

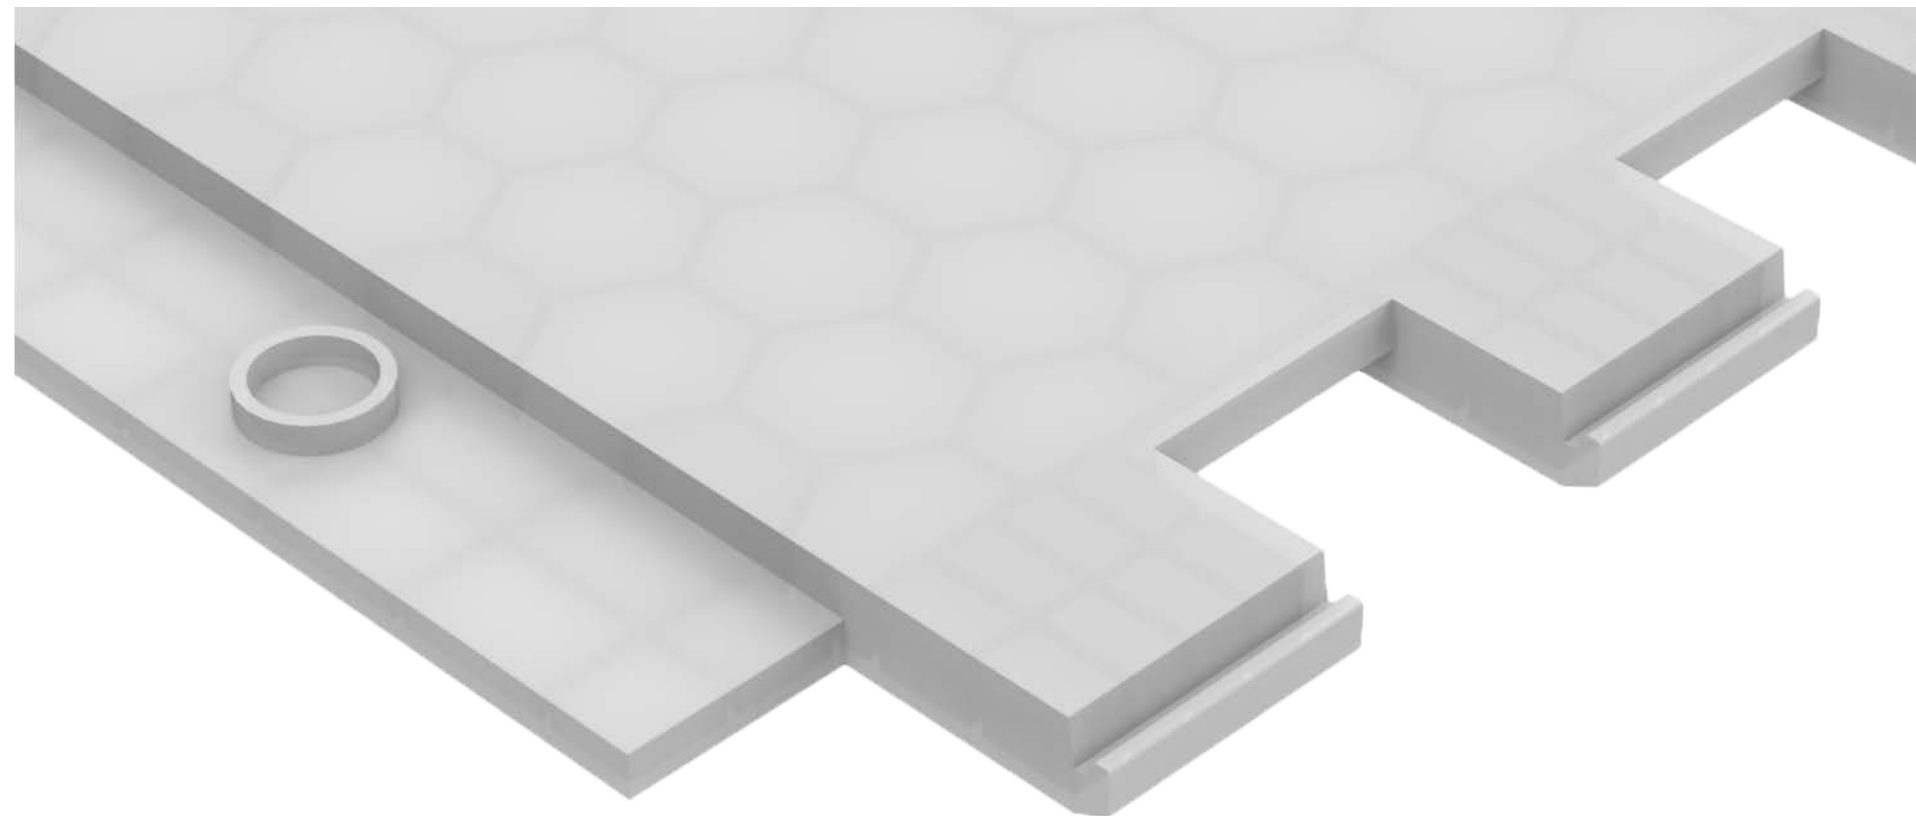

The lightest and only heavy-duty drive-able flooring system with no tools makes installation and tear down in far less time, lowering costs and saving you time.

- Efficient storage
- Lowest operating costs
- Toolless connection system
- Install in 3 directions
- Protects field while supporting heavy equipment and structures

Lowest initial purchase price of any drivable event floor.

Lowest operating cost, including install, use, tear down and storage.

Fastest event floor **install time**.

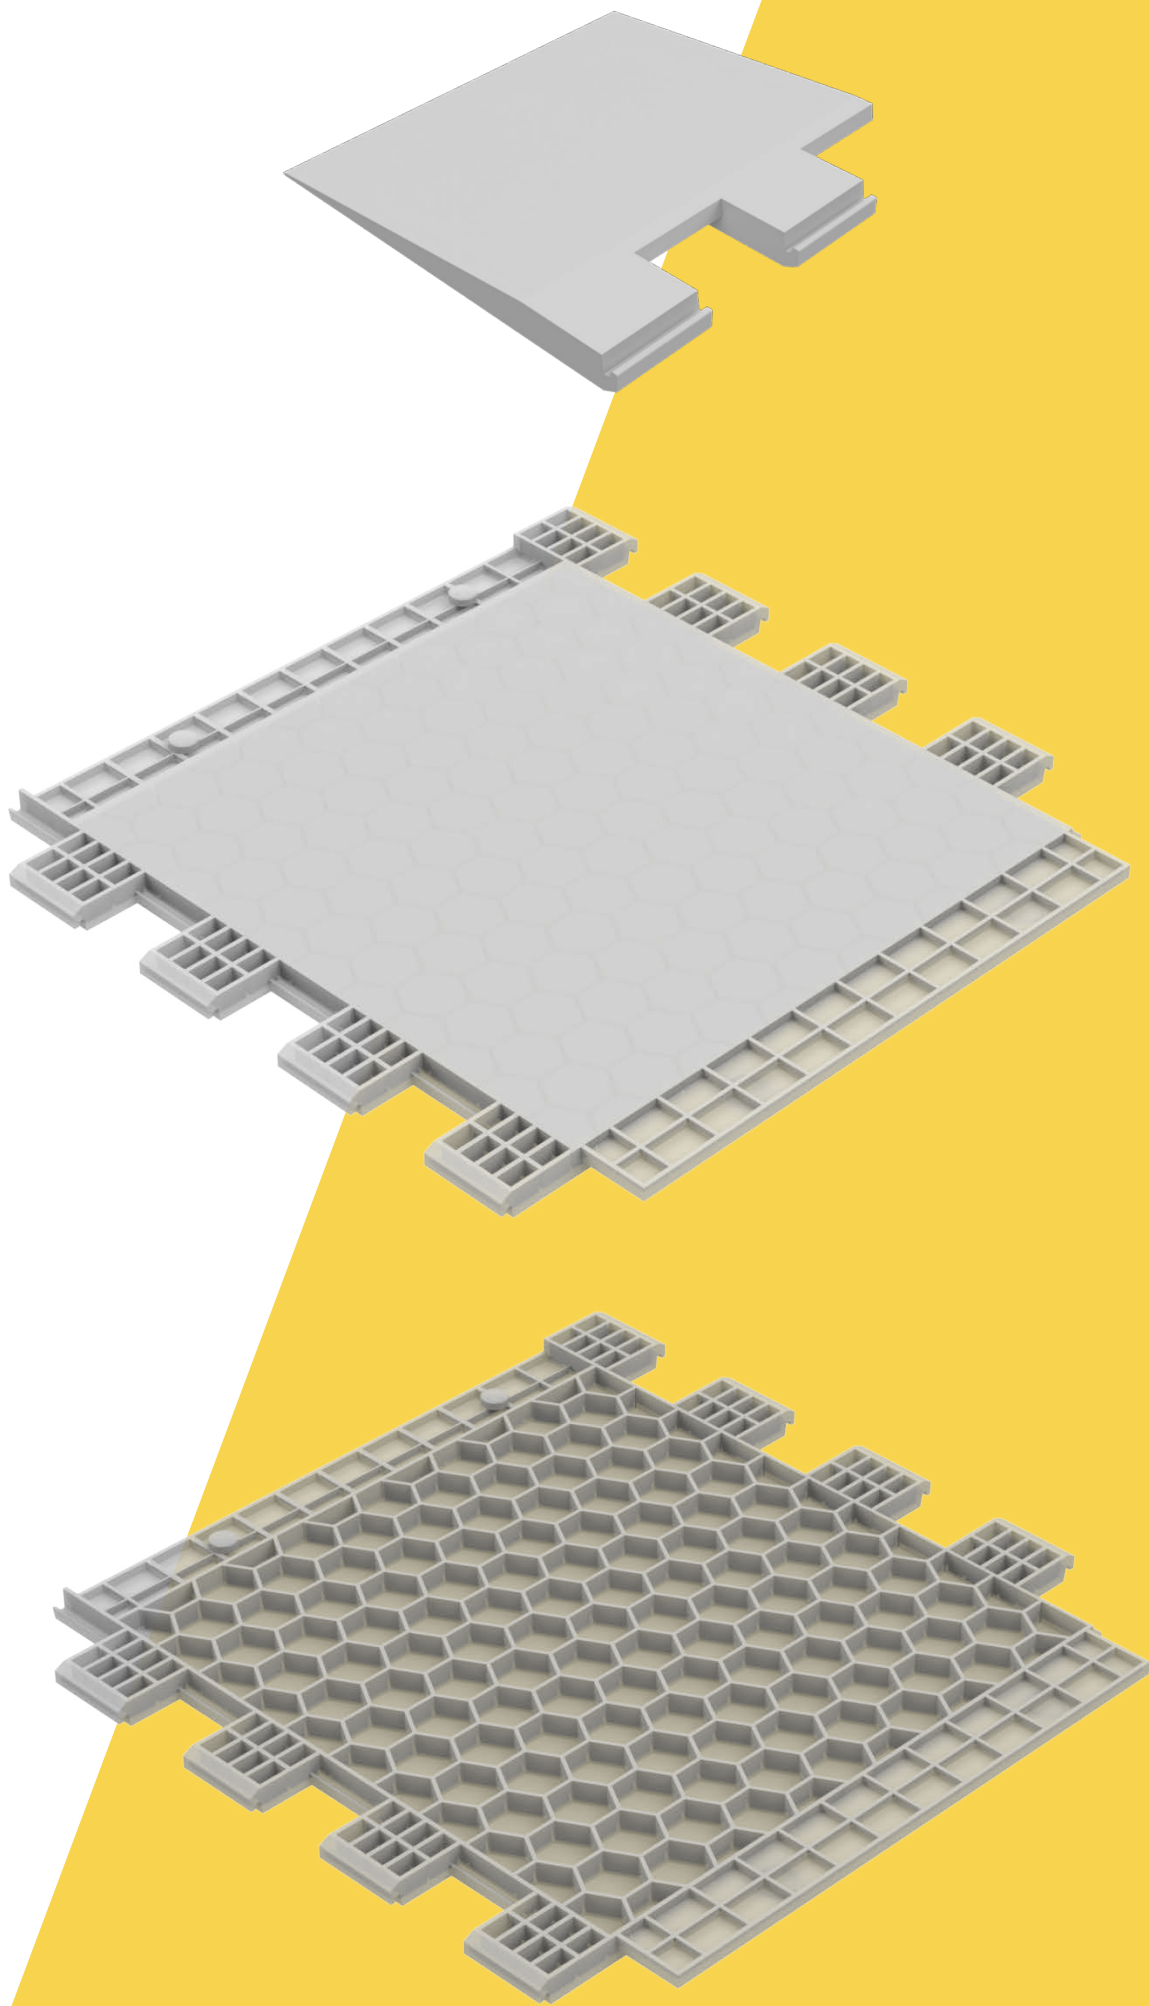

43.3” (109.98cm)

Usable Surface
39.4” x 39.4”
(100cm x 100cm)

Material: EverBase 4 is manufactured using high density polyethylene with structural modifiers than improve strength and reduce weight. The material also includes UV inhibitors that maintain material strength and flexibility while also preventing discoloration.
